中国高等教育改革口述史丛书（第一辑） *Oral History Series of China's Higher Education Reform (Series 1)*

The oral history series of higher education reform in contemporary China selects 8 representative college presidents since the 1980s to narrate the historical background and process of higher education reform in that year as well as the success and failure. The project aims to record the experience of higher education reformers through face-to-face interviews. Meanwhile, it is of great significance and urgency to compile these first-hand data into a book and pass them on to future generations. The series of books is written with the intention of rescuing and protecting the wisdom that these leaders left to us and providing some guidance for the further reform and innovation of higher education in China. It implements the spirit of "comprehensively deepening reform" of the 3rd plenary session of 18th CPC Central Committee which includes further promoting China's higher education reform to develop people's talents for the purpose of being adaptive to dynamic changes in 21st century and overcome challenges.
